

Dear parents,

Next year SJW will be offering a unique opportunity for a select few 8<sup>th</sup> grade students. We have received approval to introduce a one-of-a-kind high school level (high school credit) AEROSPACE SCIENCE CLASS. One of the key requirements is that your student must possess a passion for aviation and aerospace. Here are a few more requirements and expectations:

3.0 GPA (7<sup>th</sup> grade)

Participate in the Aviation Club (Flying club) \$30 Fee NOT DUE TILL CLASS START

Not afraid to work hard

No discipline issues

Homework up to 3 times per week

Team projects and research assignments

Math related scientific exploration

Currently, I am interviewing students in order to fill 24 spots for next year. If you think your student is interested in excelling in this class (**IT WILL BE DEMANDING**), sign below indicating your approval.

If you have questions, please feel free to email me at [Robert.null@cpsb.org](mailto:Robert.null@cpsb.org). You may Scan to PDF and email the completed form with a copy of his/her report card. Or, deliver it to me at the school.

Respectfully,

LT Robert Null, USN (Ret)  
Aerospace Science Teacher

I give my student **(Student name here)** \_\_\_\_\_  
permission to take AEROSPACE SCIENCE at SJW for the school year 2016-2017. I understand that this will be a high school level class that will take the place of enrichment. Additionally, I understand that my student will also need to take regular 8<sup>th</sup> grade science to meet state requirements.
