

Date

Dear Parent/Legal Guardian:

Your child _____ has a skin condition which appears to be contagious (open sore, unidentified rash, drainage of pus or other fluids from the site, warmth around the area, localized swelling, other _____).

One of the rules of the Calcasieu Parish School System is that any child who has such a condition **cannot remain in school**. Your child may return to school once the condition no longer exists. However, if the condition persists, please contact your physician and bring a statement from him to the school indicating that your child may return to school because his condition is no longer a health concern.

Thank you for your cooperation in this matter.

Sincerely,

Principal

All children are important to us.
