

Microsoft's Photo Story 3

Create Your First Photo Story

You can use Photo Story 3 for Windows to create visually compelling and fun stories using your pictures and music. This handout walks you through the basics of creating a photo story and shows you how easy and fun it can be!

Opening Photo Story

To begin a new story, open Photo Story from the **Start** menu.

To open Photo Story

1. Click **Start**, point to **All Programs**, and then click **Photo Story 3 for Windows**.
2. On the Welcome page, click **Begin a new story**, and then click **Next**.

Importing and arranging your pictures

First, add the pictures that you want to use in the story, and then arrange them in the order that they will be viewed.

To add pictures to your photo story

1. On the **Import and arrange your pictures** page, click **Import Pictures**.
2. In the **File Browser** dialog box, browse to **My Documents\My Pictures\Sample Pictures**.
3. Add all of the pictures listed.
To add more than one picture at a time, press and hold the CTRL key and click on the pictures you want to add, and then click **OK**.
All of your pictures should now be present in the filmstrip, as shown in the following screen shot.

The filmstrip in Photo Story is a great place to quickly make changes to your pictures and story. For example, you can drag a picture in the filmstrip to change the sequence. You can click a picture in the filmstrip and click **Edit** to change the appearance of the picture by rotating it, adjusting the color, fixing red eye or adding effects. You can also right-click a picture in the filmstrip to perform these actions. Try adding an effect to one of the pictures to see what they look like.

4. When you are finished making changes to your pictures, click **Next** to continue.

Microsoft's Photo Story 3

Adding a title to your pictures

With Photo Story 3 you can add text to a picture to create a title for your story.

To add text to your pictures

1. On the **Add a title to your pictures** page, click the first picture, and then type **My first photo story** in the text box to the right of the picture.
2. Click the **Select Font** button.
3. In the **Font** dialog box, under **Font style**, click **Bold**, and then click **OK**.
4. Click the **Align Top** button to move the title up on the page.
Repeat steps 1 and 2 to add text to another picture, and experiment with different text styles, sizes, and alignments, using different formatting buttons.
5. When you are finished adding text to your pictures, click **Next**.

Narrating your pictures

You can add narration and custom pan and zoom effects to your photo story to make it more unique and personal.

To add narration to your story you need to have a working microphone attached to your computer and set up correctly. A wizard will help you set up your microphone to record narration. There is also a text input area to create cue cards which can be a helpful memory aid when narrating your pictures.

To add narration to your story

1. On the **Narrate your pictures and customize motion** page, click the **Microphone** button.

This will launch the Sound Hardware Test Wizard. Complete the wizard by following the onscreen instructions. Once you have completed the wizard, your microphone should be ready to record narration.

2. Click a picture in the filmstrip.
3. Add any desired text in the cue card area.
4. Click the **Record Narration** button to start recording narration.
The red dot in the record button will flash indicating recording is taking place. A timer is provided to help you keep track of your narration length.
5. When you have finished narrating the picture, click the **Stop Recording** button.

6. Repeat steps 2 thru 4 for each picture for which you want to add narration.
Note Narration for each picture can not exceed 5 minutes.
7. Once you have added narration, click the first picture in the filmstrip, and then click **Preview** to see how your story looks and sounds.
8. Close the preview window, and click **Next** to continue to the next step.

Microsoft's Photo Story 3

Adding background music

With Photo Story 3 you can add music to your story by using Windows Media Audio (WMA), MP3, or WAV files or by using the **Create Music** option to create custom music that suites your story and taste.

To add pre-recorded music to your story

1. On the **Add background music** page, click the first picture in the filmstrip and then click **Select Music**.
2. On the **File Open** dialog box, click **My Documents** from the left menu.
3. Browse to **My Music\Sample Music**, click **Beethoven's Symphony No9 (Scherzo).wma**, and then click **Open**.

The music you just added is shown as a colored bar above the picture in the filmstrip, as shown in the following screen shot. This helps you determine which pictures will be shown for each piece of music you add. This is particularly helpful when you add more than one song to your story.

To create music for your story

1. Click the third picture in the film strip, and then click **Create Music**.
2. In the **Create Music** dialog box, in the **Genre** drop-down list, scroll down and select **Soundtrack**.
3. In the **Style** drop-down list, select **Soundtrack: Mysterious Cave**.
4. You can leave the default **Bands** and **Moods**, or choose different ones.
5. Click **Play** to hear what the music will sound like.
6. When the music has finished playing, click **OK** to close the **Create Music** dialog box.

There are now two different pieces of music shown as colored bars above the pictures in the filmstrip.

7. Click the first picture in the filmstrip, and click **Preview**, to see how well your music fits the story.

You may need to adjust the music volume levels to accommodate your narration. To do this, simply click the picture in the filmstrip and then adjust the music volume using the volume slider bar. You may need to adjust the volume and preview your story a few times to get it just right.

8. Click **Next**, to move on to the final steps.

Microsoft's Photo Story 3

Saving your story

When you save your photo story, all the pictures, narrations, and music are compiled into a video file that you can view in Windows Media Player. Since you will play this photo story on your computer, you can use the default options when saving your photo story.

To save your photo story for playback on your computer

1. On the **Save your story** page, verify that **Save your story for playback on your computer** is selected in the activities list.
2. Click **Browse** to specify the location and file name of your story.
3. On the **Save As** dialog box, browse to **My Documents\My Videos**.
4. In the **Filename** text box, type **My First Story.wmv**.
5. Click **Save**, and then click **Next**.

Viewing your story

When your story is built and saved, the **Completing Photo Story 3 for Windows** page will appear. You can view your newly created story or begin a new story from here. To see what you have created, click **View your story**. Windows Media Player will open and your story will begin to play.

Now that you have created your first photo story, it's time to start a new story.

Microsoft's Photo Story 3

Create a Story from a Single Still Photo

You can use the panning and zooming effects built-in to Photo Story 3 for Windows to add life to any of your still photographs. Photo Story 3 automatically assigns a straight path between the start and end positions for a picture, but you have the option to customize the picture motion by selecting a different path between the start and end positions. You can create this customized picture motion by importing the same picture multiple times and then selecting the motion and duration for each copy of the picture and the type and duration of the transitions that occur between the picture copies.

By using this method, the motion can traverse different parts of the picture, creating a more complex path (rather than a straight line) over the picture and enabling you to create a mini story based on a single picture. You can also create a "viewing window" into the picture. For this viewing window, the size of the start and end positions for the picture's motion is the same (pure panning motion). This viewing window magnifies the parts of the picture that you select to the full size of the resulting video.

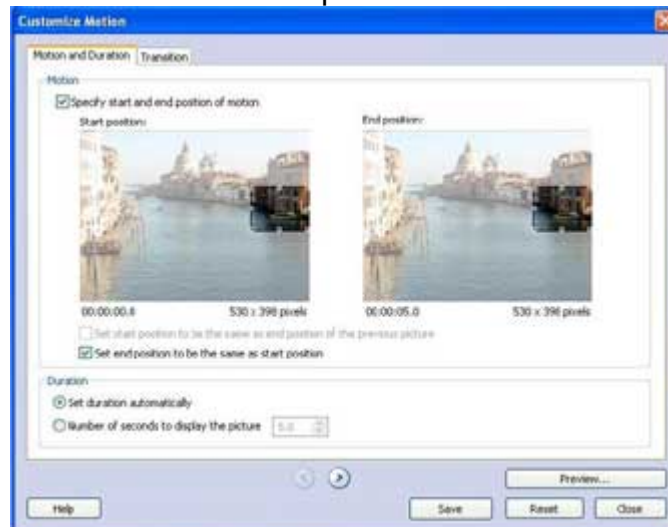

To create your own mini story

1. Open Photo Story 3 for Windows. On the welcome page, click **Begin a new story**, and then click **Next**.
2. On the **Import and arrange your pictures** page, import the same picture three times, and position the three copies of the picture next to each other on the filmstrip.
3. To customize the motion for the first copy of the picture, on the **Narrate your pictures and customize motion** page, click the first copy of the picture on the filmstrip, and then click **Customize Motion**.

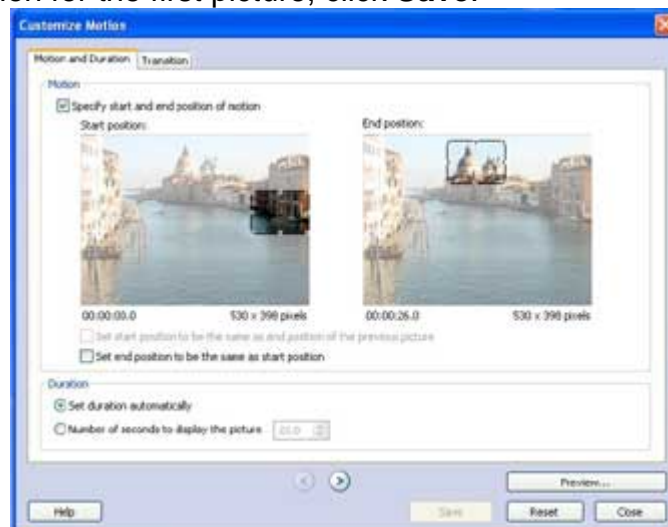

Microsoft's Photo Story 3

- On the **Motion and Duration** tab, complete the following tasks for the first picture:
 - Select the **Specify start and end position of motion** check box.
 - For the **Start position**, move the position rectangle to select the area where you want the motion for the first picture to begin.
 - To create a pure panning motion for the first copy of the picture, select the **Set end position to be the same as start position** check box. This option ensures that the rectangle for the start and end positions is the same size.

- For the **End position**, move the position rectangle to select the area of the picture where you want the motion for the first picture to end.
- To save the motion for the first picture, click **Save**.

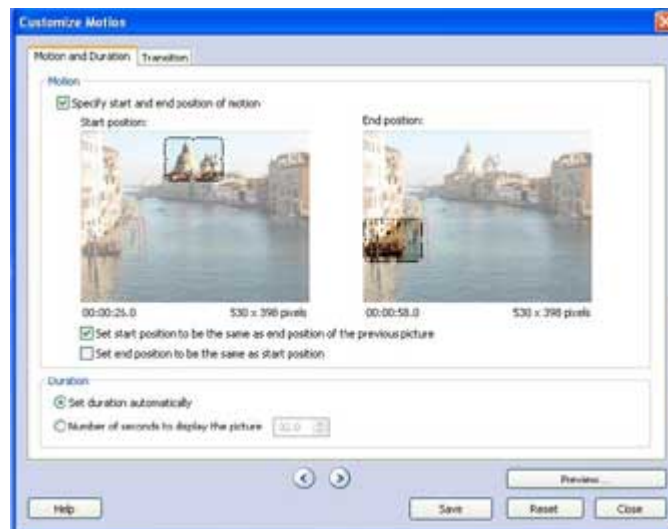

- To set the motion for the second copy of the picture, click the **Next picture** arrow button at the bottom of the **Customize Motion** page.

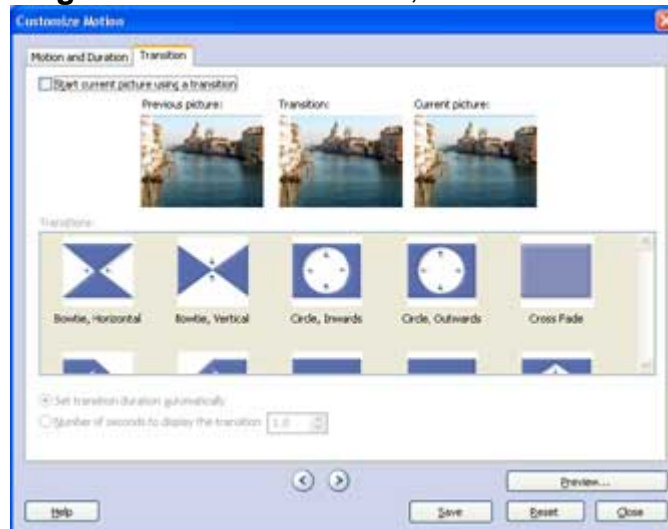

Microsoft's Photo Story 3

6. On the **Motion and Duration** tab, complete the following tasks for the second copy of the picture:

- Select the **Specify start and end position of motion** check box.
- Select the **set start position to be the same as the end position of the previous picture** check box.
By setting the starting position for the second copy of the picture to be the same size and position as the end position for the previous copy of the picture, you create continuous motion over the picture.
- To continue creating a pure panning motion, select the **set end position to the same as start position** check box, and then move the position rectangle for the end position to the location where you want the motion for the second picture to end.

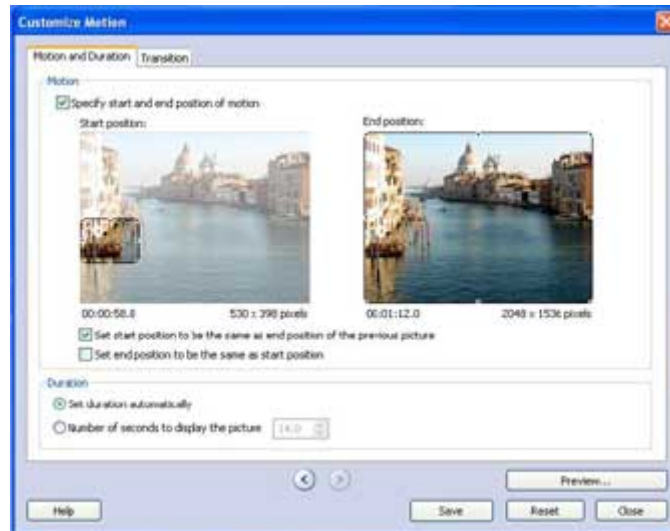

7. To ensure uninterrupted motion between the first and second pictures, remove any transitions between them. To do so, click the **Transition** tab, clear the **Start current picture using a transition** check box, and then click **Save**.

Microsoft's Photo Story 3

8. To set the motion for the third copy of the picture, click the **Next picture** arrow button at the bottom of the **Customize Motion** page.
9. On the **Motion and Duration** tab, complete the following tasks for the third copy of the picture:
 - Select the **Specify start and end position of motion** check box.
 - Select the **Set start position to be the same as the end position of the previous picture** check box.
 - To have the picture motion expand to the entire picture (rather than a specific part of the picture) at the end of your story, double-click the position rectangle for the end position.

10. To remove any transitions between the second and third pictures, click the **Transition** tab, clear the **Start current picture using a transition** check box, and then click **Save**.
11. You have successfully created a mini story using just one picture! To preview your mini story, click **Preview**.
