

Virtual teachers at LCB Academy will provide Blackboard Collaborate online live tutoring on school days to any high school CPSB student who is enrolled in virtual core courses. The student must first enroll in the Blackboard site of the appropriate teacher below. (See directions for Self-Enrolling in a Course.) Then go to that teacher's Blackboard site and look on the left side of their Blackboard page for the Blackboard Collaborate link. Click on it and your teacher will join you shortly to assist you with specific problems or questions that you have on the assignments you are working. (See direction for Accessing & Joining a Collaborate Session.)
