| :---: | :---: | :---: | :---: | :---: | :---: |
| Module 4: Expressions and One-Step Equations Topc C Equivalent Expressions Using the Properties Of Operations |  |  |  |  |  |
|  | Monday Feb. 12th | Tuesday Feb 13th | Wednesday Feb. 14th | Thursday Feb. 15th | Friday Feb. 16th |
| Lesson | No School | No School | No School | Topic C Quiz: <br> Equivalent Expressions Using the Properties of Operations | Lesson 17:Equations and Solutions |
| Pages | 0 | 0 | 0 | 0 | 0 |
| We will... | 0 | 0 | 0 | 0 | determine whether a number sentence is true |
| Bell Ringer | 0 |  | 0 |  | evaluate expressions |
| Exit Ticket | 0 | 0 | 0 | 0 | determine whether a number sentence is true |
| I will... | 0 | 0 | 0 | 0 | explain how I know whether a number is a solution to an equation |
| State Standards | 6.EE.A. 1 Write and evaluate numerical expressions involving whole-number exponents. |  |  |  |  |
|  | 6.EE.A. 2 Write, read, and evaluate expressions in which letters stand for numbers. a. Write expressions that record operations with numbers and with letters standing for numbers. For example, express the calculation "Subtract y from 5" as $5-\mathrm{y}$. |  |  |  |  |
|  | 6.EE.A.2b. Identify parts of an expression using mathematical terms (sum, term, product, factor, quotient, coefficient); view one or more parts of an expression as a single entity. For example, describe the expression $2(8+7)$ as a product of two factors; view $(8+7)$ as both a single entity and a sum of two terms. |  |  |  |  |
|  | 6.EE.A.2c. Evaluate expressions at specific values of their variables. Include expressions that arise from formulas used in real-world problems. Perform arithmetic operations, including those involving wholenumber exponents, in the conventional order when there are no parentheses to specify a particular order (Order of Operations). For example, use the formulas $\mathrm{V}=\mathrm{s} 3$ and $\mathrm{A}=6 \mathrm{~s} 2$ to find the volume and surface area of a cube with sides of length $s=1 / 2$. |  |  |  |  |
