| Mrs. Logan 7th Grade Math Week 22: January 29 - February 2 |  |  |  |  |  |
| :---: | :---: | :---: | :---: | :---: | :---: |
| Module 4: Geometry <br> Topic A: Constructing Geometric Figures Topic B: Constructing Triangles |  |  |  |  |  |
|  | Monday January 29th | Tuesday January 30th | Wednesday January 31st | Thursday February 1st | Friday February 2nd |
| Lesson | Lesson 3: Side <br> Lengths of a <br> Triangle | Lesson 4: Angles of a Triangle | Lesson 5: <br> Constructing <br> Quadrilaterals and <br> Triangles | Module 4 Topic A Quiz | Lesson 6: Unique Triangles |
| Pages | 43-54 | 55-75 | 77-89 | 7-89 | 91-106 |
| We will... | determine how to predict when a triangle can be formed with three given side lengths. | determine how to predict whether a triangle can be formed with given angle measures. | find out if identical shapes are created with given information and do the same for triangles and a variety of other quadrilaterals. | explore two and three dimensional figures and construct geometric figures. | explore how many conditions, or given pieces of information, are needed to guarantee a unique triangle. |
| Bell Ringer | Making a Triangle | Tracing Angles | Identifying Measurements | Quiz Prep | Angles of a Triangle |
| Exit Ticket | Triangle Side Lengths | Triangle Angles | Unique or Not? | Quiz Feedback | Identical or Not? |
| I will... | identify and understand what is needed to create a triangle. | identify and understand what is needed to create a triangle. | identify what makes a shape identical or unique. | draw and construct geometric figures, understand what makes figures identical and properties of triangles. | determine what conditions guarantee a unique triangle. |
| Reminders |  |  |  | Module 4 Topic A Quiz | Vocab Quiz |
| State <br> Standards | 7.G.A.2Draw (freeh conditions. | nd, with ruler and pr | ractor, or with tech | logy) geometric shap | es with given |
