| Mrs. Logan Advanced Math <br> Week 15: November 27th - December 1st |  |  |  |  |  |
| :---: | :---: | :---: | :---: | :---: | :---: |
| Module 3: Two-Dimensional Geometry Topic D: Scale Drawings and Dilations |  |  |  |  |  |
|  | Monday <br> November 27th | Tuesday November 28th | Wednesday November 29th | Thursday November 30th | Friday December 1st |
| Lesson | Lesson 18: Scale Drawings | Lesson 19: Finding Actual Distances from a Scale Drawing | Lesson 20: Scale and Scale Factor | Lesson 21: Modeling with Scale Drawings | Lesson 22: Dilations |
| Pages | 293-308 | 309-324 | 325-338 | 339-355 | 357-369 |
| We will... | explore characterisitivs of enlargements and reductions and draw englargements and reductions of figures. | write equations that allow us to find unknown side lengths of original figures of their scale drawings. | use relationships between distances on a map and actual distances to find unknown distances and relate the ares of figures to their scale drawings. | create a scale drawing of a scale drawing and describe how the second relates to the original figure. | produce enlargements and reductions by applying a dilation. |
| Bell Ringer | Corresponding Segments | Scale Drawing? | Map Relationships | Conjecture | Precise Language |
| Exit Ticket | Enlargement or Reduction? | Applying the Scale Factor | Actual Distances | Scale Drawing of a Scale Drawing | Dilation Drawing |
| I will... | create a scale drawing by using the proportional relationship that exists between corresponding distances. | use a scale factor to find unknown lengths of a scale drawing or of the original figures. | describe the area of a scale drawing with scale factor $r$ as $r$ squared times the area of the original figure. | model a scale drawing by reproducing a scale drawing at a different scale. | describe dilations and the effects of dilations and understand what scale drawing different scale factors produce. |
| Reminders |  |  |  |  | $\begin{aligned} & \text { M3TD Quiz on } \\ & \text { Monday, December } \end{aligned}$ 4th |
| State | 7.G.A.1. Solve problems involving scale drawings of geometric figures, such as computing actual lengths and areas from a scale drawing and reproducing a scale drawing at a different scale. |  |  |  |  |
| Standards | 8.G.A.3. Describe the effect of dilations, translations, rotations, and reflections on two-dimensional figures using coordinates. |  |  |  |  |
