Use the RDW process to solve the problems below. Use a letter to represent the unknown in each problem.

1. Jerry pours 86 milliliters of water into 8 tiny beakers. He measures an equal amount of water into the first 7 beakers. He pours the remaining water into the eighth beaker. It measures 16 milliliters. How many milliliters of water are in each of the first 7 beakers?

   \[
   \begin{align*}
   \text{86} & \quad \text{16} \\
   -\quad & \quad - \quad 16 \\
   \text{70} & \quad \text{b = 70 ÷ 7} \\
   \end{align*}
   \]

   There are 10 mL of water in each of the first 7 beakers.

2. Mr. Chavez’s third-graders go to gym class at 11:15. Students rotate through three activities for 8 minutes each. Lunch begins at 12:00. How many minutes are there between the end of gym activities and the beginning of lunch?

   \[
   \begin{align*}
   11:15 & \quad \text{end} \\
   11:39 & \quad \text{Gym} + 24 \\
   12:00 & \quad \text{Lunch} - 39 \\
   m & \quad = 60 - 39 \\
   \end{align*}
   \]

   There are 21 minutes between the end of gym activities and the beginning of lunch.

3. A box contains 100 pens. In each box there are 38 black pens and 42 blue pens. The rest are green pens. Mr. Cane buys 6 boxes of pens. How many green pens does he have in total?

   \[
   \begin{align*}
   38 & \quad 42 \\
   +\quad & \quad - \quad 80 \\
   20 & \quad \text{20 x 6 = 120} \\
   \end{align*}
   \]

   Mr. Cane has 120 green pens.
4. Greg has $56. Tom has $17 more than Greg. Jason has $8 less than Tom.

a. How much money does Jason have?

\[ J = 73 - 8 \]

\[ \text{Jason} = \frac{613}{73} - 8 = \frac{65}{65} \]

Jason has $65.

b. How much money do the 3 boys have in total?

\[ m = 73 + 65 + 56 \]

\[ m = 194 \]

The three boys have $194 in total.

5. Laura cuts 64 inches of ribbon into two parts and gives her mom one part. Laura’s part is 28 inches long. Her mom cuts her ribbon into 6 equal pieces. How long is one of her mom’s pieces of ribbon?

\[ \frac{64}{28} \]

\[ \frac{28}{?} \]

\[ \frac{84}{5} \]

\[ -28 \]

\[ \frac{36}{36} \]

\[ m = 64 - 28 \]

\[ m = 36 \]

\[ R = 36 \div 6 \]

\[ P = 6 \]

One of Laura’s mom’s pieces of ribbon is 6 inches.
