Use the RDW process to solve the following problems.

1. Linda makes booklets using 2 sheets of paper. She has 17 sheets of paper. How many of these booklets can she make? Will she have any extra paper? How many sheets?

2. Linda uses thread to sew the booklets together. She cuts 6 inches of thread for each booklet. How many booklets can she stitch with 50 inches of thread? Will she have any unused thread after stitching up the booklets? If so, how much?

\[ 6\sqrt{50} \]
\[ 6\times 8 \]
\[ 48 \]
\[ \frac{50}{2} \]

She can sew 8 booklets and she will have 2 inches of thread unused.

3. Ms. Rochelle wants to put her 29 students into groups of 6. How many groups of 6 can she make? If she puts any remaining students in a smaller group, how many students will be in that group?
4. A trainer gives his horse, Caballo, 7 gallons of water every day from a 57-gallon container. How many days will Caballo receive his full portion of water from the container? On which number day will the trainer need to refill the container of water?

\[ \begin{array}{c}
7 & | & 57 \\
\phantom{7} & | & \phantom{57} \\
\phantom{7} & | & \phantom{5} \times \phantom{7} \\
\phantom{7} & | & \phantom{5} \times \phantom{7} \\
\end{array} \]

\[ 8 \text{ R. 1} \]

Caballo will have 8 full portions of water from the container. On the 9th day, the trainer will need to refill the water.

5. Meliza has 43 toy soldiers. She lines them up in rows of 5 to fight imaginary zombies. How many of these rows can she make? After making as many rows of 5 as she can, she puts the remaining soldiers in the last row. How many soldiers are in that row?

\[ \begin{array}{c}
5 & | & 43 \\
\phantom{5} & | & \phantom{43} \\
\phantom{5} & | & \phantom{40} \times \phantom{5} \\
\phantom{5} & | & \phantom{40} \times \phantom{5} \\
\end{array} \]

\[ 8 \text{ R. 3} \]

She can make 8 full rows of 5 soldiers in each. The 9th, last, row will have 3 soldiers in it.

6. Seventy-eight students are separated into groups of 8 for a field trip. How many groups are there? The remaining students form a smaller group of how many students?
